

THE CHRONICLE.

V. IV. 1907. KAMMONT ALBERTA. APR. 10 1907. No. 52

Same as Ours.

The following is a decision by the Supreme Court of the United States affirming the judgement of a lower court in a case involving the right of a town to insert a clause in its deeds prohibiting the sale of intoxicating liquors.

In the Colorado reports is a case in which a man accepted a deed from the Colorado Springs Co. which contained a clause and between the parties that intoxicating liquor should never be manufactured sold or otherwise disposed of as a beverage in any place of public resort on the premises, and it was expressed declared that in case this condition was broken by the grantee his heirs or legal representatives, the deed should become null and void and the title to the premises surveyed should revert to the grantor and that the grantee excepting the deed agreed to this condition. The defendant Cowell went into possession of the premises under the deed, and soon afterward opened a billiard room in a building thereon which became a place of public resort where he sold and disposed of intoxicating liquors as a beverage. The grantor thereupon brought an action of exception for the premises the title to which it claimed had reverted to upon breach of the condition contained in the deed and it received judgment.

In a Light Vein

Manager Ellison has given out the information that the Sugar Co. despite the current rumors of its heavy losses is still solvent, and that a dividend of 10 per cent had been declared and while the manager did not affirm neither did he deny that there was still something left out of the year's profits in addition to the 10 per cent dividend. The following is an extract from the minutes of the directors meeting held April 1st, 1907 at 69 East South Temple. A motion of Jno. R. Winder it was agreed to pay 10 per cent dividend in four quarterly payments.

Lethbridge Ball.

Enthusiastic J. E. Eckstorm who carries a lot of push for the Lethbridge base ball team hands out some dope on ball matters that will interest all ball fans.

The Athletic Association of Lethbridge starts off with a salary

list that calls for its players to receive from \$40 to \$100 per month; they have at present four pitchers and sixteen men as fielders and basemen.

These will be called until the number will be reduced to about eleven men which will form the team that will be looked to about the enemy's scalp and if they do not make good and get the scalp then they will explain satisfactorily why they did it.

There are to be forty five games of fast ball played in Lethbridge during the season, the grounds are being put in the best possible shape the new grand stand which will accommodate 1200 people will be fitted with all the attachments of grand stands which conduces to the comfort and thirst of the attending public and nothing will be neglected that shall insure the success of the baseball season of 1907.

Weed Seeds in Feed And Seed.

In the new Noxious Weeds Act which was passed at the recent session of the Legislature of Alberta, there are two clauses which should be of special interest to farmers, stockmen, millers and dealers in feed and bran through out the Province. These are:

"13. No person shall sell or dispose of, or offer for sale or disposal of have in his possession for sale, any grain, grass, clover or other seeds intended for the purpose of seed, in which there is more than five seeds of any noxious weed or weeds per thousand of such seed."

"14. No person shall purchase or sell, barter or otherwise dispose of or remove from any premises, any seed, whether of grain or other seed, grain or cleanings containing seeds of noxious weeds unless the germinating qualities of such seeds have been destroyed."

Any one stopping to think of the acres upon acres of good land which have been rendered foul in the first crop, either from weed seeds being introduced in the seed or the feed, will recognize the importance of having these clauses strictly enforced, and it is to be hoped that dealers will be careful to furnish none but clean seed or feed both in their own interest and that of the farmers throughout the Province.

Cigars to burn.

An immense box, contained 1000

cigars, arrived at Buckingham Palace. It was a present from Baron Ribbentrop to King Edward. For over thirty years His Majesty has received a similar present from the Baron. The cigars are worth about \$2.65 each.

Ogden Money in Missouri.

Kansas City Mo.— The Utah Power Co. of Ogden Utah, has bought eighteen acres of land close to Independence, Mo. ten miles from here upon which it intends to erect a factory that will employ 600 men. It is said that the employees are to come from Lamont, Iowa, and other Mormon colonies in the West. It is believed to be another step in the long standing movement to establish a greater Mormon centre at Independence, Standard.

Contagious Diseases in Domestic Animals.

Extract from Public Health Act 1907.

84. Whenever an animal is ill from anthrax, glanders or rabies the powers of such an animal, as the veterinary surgeon, if any, called to it attend, shall at once declare the existence and nature of such disease to the medical health officer of the district who shall at once give notice to the provincial health officer.

85. The medical health officer or provincial health officer shall at once cause to be isolated in a completely isolated apartment or in a special building or enclosure any animal which he knows or suspects to be sick with anthrax, glanders or rabies and such animal so isolated shall remain so until the animal dies or recovers and the premises disinfected in the manner described in Schedule 10.

86. Whenever a person attends to animals sick with anthrax or glanders shall not attend to other animals nor enter any house without having previously disinfected his person and clothes.

87. Bodies of animals which have died of anthrax or glanders shall not be skinned but shall within six hours after death be buried or buried under three feet of earth after having been covered with quick lime a foot deep.

Electric Light.

At a meeting of the Town Council

on Thursday evening a resolution was submitted by the Mayor and accepted by the Council which means the installation of an electric light plant before October 1st, this year. The franchise and agreement will be published in full in our next issue.

A Big Time

Lethbridge, April 10th.— The citizens of Lethbridge at a mass meeting, decided to hold a grand celebration on May 9th, the first anniversary of the birthday of the City. Mayor Galbraith declares this day a civic holiday. A committee has been appointed and a program has been projected, a grand procession in the morning, followed by base-ball, foot-ball, and lacrosse matches between home teams. The Lethbridge Cadets will give a grand military display while a massed band concert, banquet and fire works form the evening portion of the program.

It is understood that a large number of invitations will be issued to outside towns to spend the day in Lethbridge, while outside baseball and athletic associations will be invited.

Easy Money

The following communication accompanied by a \$50 check was received by Miss Edith Johnson on Wednesday. The young lady is a sample of what Raymond can do when it comes to intellectual contests:

Calgary, April 10th, 1907. We have great pleasure in enclosing you our Piano Cheque for \$50.00 and would compliment you on your skill in figuring so close in our prize competition.

We trust you will avail yourself of this opportunity to secure a First Class Piano, but should you not be in a position to negotiate with us within the sixty days, an extension might be arranged by communicating with us at an early date.

Yours truly,
Alberta Piano & Organ Co.

Miscellaneous

This week the wind has completed the circle of directions having blown from all angles of North South East and West, and while there has been no storm the weather has been kept too cold for the growth of vegetation. Planting is in steady progress and the ground is in excellent shape for crops.

There may be no truth in it but rumor has it that Mr. Turp Young foreman of the Alberta Land and Stock ranch may establish himself as a domestic man as he has been looking at houses and lots in Raymond with the view of purchasing.

The business of Ernest Kinball has been taken over by Messrs. Kenny Henroid and Rouse who occupy in the company the executive offices of President, Vice-President and Manager, who are also the board of directors. The company should thrive possessing as it does a capable list of officers and directors.

Ray Knight came back to us last week from his trip to Utah which was undertaken for purely healthful reasons. Mr. Knight is again at his desk which is in the shape of a vest pocket memorandum that he carries with him horseback. His latest stool is a pinto horse which he occupies faithfully until the stool collapses.

A gentleman who professes to be acquainted throughout the state of California says Grisdley the place which is agitating so many of our Raymond residents is notoriously a locality where there are no abundance and people who have ever suffered with "shakes" would not select such a residence location.

Electric Lights

In another column will be found the account of the action taken by the Sugar Co directors at their meeting on Apr. 1st. respecting the matter of electric lights for Raymond.

The town council and the manager of the Sugar Co. will now proceed to effect the settlement of details that will give Raymond electric lights.

The Sugar Co. is going into this project because the lights will be an improvement to the town and not because the investment is attractive to them as a profitable place to put money and while the announced policy of our council is to part with no privileges to corporations they should see to it that no reasonable condition shall stand in the way of our getting electric lights.

Their value to the town will be incalculable and the little real estate activity we have had here will be increased many fold by so desirable an improvement as electric lights because the value of all town property will be increased beyond the price of the electric light plant.

An opportunity is before us to do good to ourselves and the council should see to it that the opportunity be taken advantage of and the town given a good light service.

The following is from the minutes:

On motion of Joseph F. Smith the suggestion to establish an electric light plant at Raymond to

cost about \$12000 was adopted provided the manager shall on investigation consider it profitable.

A Season of Shooting Stars

This is the hopeful season when we read with thrills of happiness

How Jones our new third baseman, fills the trembling pitchers with distress; He swings his bat above the plate and wears a look of confidence, And when he hits the ball is lost beyond the farthest outfield fence.

We view with joy the pictures of McKee and Schmidt, the sturdy pair Of pitchers who are booked to make opposing batters hit the air;

The speed which they are showing now relieves us of the slightest fear That we may not have strength to take the pennant for our own this year.

Bill Brown, the mighty catcher whom our captain signed six weeks ago,

Is eating up the swiftest curves and, Moses! how the man can throw!

O'Keefe, our new left fielder, too, is hitting up a splendid pace;

It looks as if the other teams will simply not be in the race.

This is the hopeful season when we read with joy from day to day

What wonders all our new men are, what strength and swiftness they display:

A few weeks hence a paragraph in very small type now and then

Will yield the knowledge that these stars are in the minor leagues again.

Watch the feet of the growing colts. Even on pasture it is often necessary to shorten the toes with a rasp. If the toes are kept short, the quarters will take care of themselves and the frogs will bear upon the ground and keep the heels properly spread. A little attention in properly caring for the feet of the colt is likely to mean hundreds of dollars when the colt is three or four years old.

Twenty Years Ago

I wandered to the village, Tom, and tried to find the tree

On which we carved our names one day when we were happy, free

But there was nothing doing, Tom, the tree'd been stricken low

By the village lumber company since twenty years ago.

The little old red school house, Tom, that stood upon the hill

Is gone, and in its place a sign reads: "Try a Purple Pill."

Where once stood gnarled apple trees with fruit a bending low

They've built a modern brewery Tom—since twenty years ago.

Do you remember Geraldine—she of the sunny hair?

None in all the village, Tom, was half so sweet and fair.

I lost my heart completely, Tom and tried to be her beau—

She's fat, red faced—six children Tom—since twenty years ago.

I wandered to the village green where we, when heedless boys, Played one-old-cat and pull-away and knew so many joys;

And Tom, that green is on the bum; it really grieved me so

To find potatoes growing there since twenty years ago.

'Tis sweet to dream of all those things that we in boyhood knew The school, the green, the meadows where fragrant blossoms grew;

Ah Tom, I'm not a knocker, but don't pay out hard earned dough

For railroad fare to visit scenes of twenty years ago.

One Advantage of England's Pigeons.
 "Should succeed in finding ways and means for dissipating the foggy conditions of England's atmosphere I am afraid that country will lose more than it gains," said a weaver. One of the reasons why English weavers produce fabrics of finer and softer finish than American weavers from the same quality of cotton and other yarn is because of the damp condition of the atmosphere in that country at all times. "It is a well known fact that yarn spins continually and uniformly damp will spin finer and softer than that drying out in the process of weaving. Thousands of dollars have been spent by our weavers in appliances to keep their shops uniformly humid, but thus without success. The due quality of Panama hats, for instance, if the straw were not kept damp while the process of weaving is not produced. The straw is not worked under water, as many suppose, but is kept uniformly damp by being worked in the early morning hours when a heavy dew is falling."

He Wanted That Wink.
 General Sir R. Hamley is cited as the authority for a good anecdote about Bismarck. Hamley was sitting close to the chancellor at luncheon, with the old Emperor William not far off. Bismarck, talking rather loudly, described the old monarch as being generous, but very forgetful. Hamley got nervous, as he thought the emperor would hear. "For instance," continued Bismarck, "I pleased him the other day, and he asked me what he could do for me. I said, 'Give me the title of Tokay you have in your cellar,' and he said he would. 'But,' added Bismarck, raising his voice still higher, 'he hasn't done it.' Here Hamley lastly broke in, 'I beg your pardon, but I am really afraid the emperor will hear you.' 'I want him to hear me!' roared Bismarck. 'That's just what I want.' And a smile broke over the face of his imperial master—'Fifty Years of Fleet Street.'"

Tiger Story From India.
 A man living in a village near Lucknow is reported to have had an extraordinary adventure in the jungle. He had gone in search of two buffaloes that had gone astray when he was attacked by a tiger.

He was wounded except for a heavy cut, with which he fought until overcome by loss of blood, when he sank unconscious. At this moment the two buffaloes appeared. One of them stood over the wounded man, while the other snorted and tossed his head. The man recovered consciousness and staggered to his feet, when the tiger made another spring at him. The beast was, however, received on the horns of one of the buffaloes and was so badly wounded that it turned tail and slunk away—London Express.

Liquid Metal Polish.
 Take eight ounces of Spanish whiting, which must be perfectly free from grit, and put in one quart of gasoline. Shake up the whiting and gasoline thoroughly. You will notice the whiting settles immediately, leaving the liquid as clear as water. To remedy this and, further, to make it a better polishing agent, add to each quart of the mixture thirty-two drops of stic acid—no more, no less. Shake again, and the whiting will not settle. Apply to gold, silver, nickel, brass, steel or any kind of metallic surface with a piece of cotton flannel, rubbing well. Polish with a piece of same cloth—Blacksmith and Wheelwright.

Waterproofing Dress Goods.
 One of the most important processes used for waterproofing dress materials is on the lines of the old alumina process. In this case the factor used is rosin dissolved in a large bulk of petroleum spirit. The fabrics to be proofed are passed through a bath of this solution and dried to drive off the solvent. Following this, the goods are treated by pressing with hot polished metal rollers. This last process melts the small quantity of rosin which is deposited on the cloth and leaves each single fiber with an exceedingly thin film of rosin on it.

Forests and National Prosperity.
 As a living example of the consequences of deforestation we need simply look to Spain, a country which centuries ago was rich in timber and agricultural products, a proud spearhead of world conquerors. Spain's decadence dates from the time when her timber supply became exhausted, her shipbuilding relaxed and her barren, unprotected soil ceased to bear fruit—Forum.

A Long Way Around.
 A man with a large family of daughters on his hands may profit by the following suggestion: An old lady who had several unmarried daughters fed them largely on a fish diet because, as she ingeniously observed, "fish is rich in phosphorus, and phosphorus is useful in making matches."

Her First Dinner.
 "Yes," said Newtweed, "my wife and I are housekeeping now. She prepared our first dinner last night with her own fair hands."
 "How was it?" asked Rachel.
 "Well, the mutton and raisins were fine."

Most Deadly of Insects.
 Freddie—That creature actually told me to mind my own business. "Knowl Chely—The impudent wretch! Freddie—Positively insulting! As if it isn't enough, don't you know, that I was in business!"
 Nobody can help being born stupid, but anybody can help becoming stupider than he was born—Lady Helen Fortescue.
